

## Mobility service

[Back to results](#)

We provide mobility services for children and young people across East Berkshire and South Buckinghamshire.

We support children aged 12 months and upwards who have severe, long-term degenerative physical difficulties and postural challenges and who require special seating and wheelchairs. Conditions we work with include cerebral palsy, neurological conditions, amputations, palliative care and cardiovascular conditions.

Our team of highly-trained specialist staff provide holistic evidence-based assessments to provide bespoke mobility equipment for children and young people.

### Who to contact
